ASIS ANUPAM MOHANTY

aashishanup15 | Asis Anupam Mohanty | aashishanupam3@gmail.com | +91 9938680364

Summary

Electronics and Electrical Engineering undergraduate (B.Tech, 2027) trained in **PLC programming** on **Siemens TIA Portal V17** and **Allen-Bradley RSLogix** at CTTC Bhubaneswar, with industrial exposure to **SCADA** process control and plant instrumentation at NALCO Smelter Plant. Built embedded projects on Arduino and ESP32 and Python/OpenCV-based vision and recognition systems.

Work Experience & Industrial Training

Vocational Trainee (NALCO Smelter Plant, Angul) May 2026 – June 2026

- Completed one-month training in the **E&I C.R.L. & Telecommunication Department** of NALCO's integrated Smelter Plant.
- Observed pressure transmitters, RTDs, thermocouples, LVDTs, flow/level switches, and load cells used in plant instrumentation.
- Studied PLC hardware architecture and **SCADA**-based process control used in aluminium smelting.
- Learned **XRF** and **OES** working principles for material characterization and quality control.

PLC Training Trainee (CTTC, Bhubaneswar) May 2025 – June 2025

- Programmed industrial control logic in **Ladder Logic (LAD)**, **FBD**, and **Statement List (STL)** on **Siemens TIA Portal V17** and **Allen-Bradley RSLogix**, and used an **HMI**.
- Applied automation system design principles to real-time control scenarios and process troubleshooting.

Projects

Distance Measurement Device (Arduino)

- Built an ultrasonic-sensor distance measurement unit on Arduino with real-time LCD display.
- Applied data averaging and filtering to reduce sensor noise and improve accuracy.

Android Gamepad (ESP32)

- Designed a wireless Bluetooth game controller on ESP32 for Android devices.
- Optimized button mapping and serial communication for low latency through iterative testing.

Autonomous EV Perception & Emergency Response System

- Built real-time obstacle detection for autonomous vehicles using OpenCV computer vision.
- Developed an acoustic fusion module that detects emergency sirens and triggers automated responses.

Devanagari Script Recognition System

- Developed a machine learning system in Python (NumPy, Pandas, OpenCV) to recognize handwritten and printed Devanagari characters.

Education

2023 – 2027	**B.Tech in Electronics and Electrical Engineering**, KIIT University, Bhubaneswar (CGPA: 6.94, as of 6th Semester)	
2022	**Class 12th**, DAV Public School, CDA, Cuttack	(80.4%)
2020	**Class 10th**, DAV Public School, CDA, Cuttack	(95%)

Skills

Automation & Control	Industrial Automation, Process Control, PLC Programming (LAD, FBD, STL), HMI, SCADA, Industrial Instrumentation, Siemens TIA Portal V17, Allen-Bradley RSLogix
Hardware Platforms	Arduino, ESP32, PLCs (Siemens, Allen-Bradley)
Core Competencies	Embedded Systems, Control Systems, Microcontroller Interfacing
Software & Tools	Simulink, MATLAB, Jupyter Notebook
Programming & Data Tools	Python, C
Libraries & Frameworks	NumPy, Pandas, OpenCV (basic)
Machine Learning & Data	Machine Learning (Basics), Data Analysis, Data Preprocessing
